

Bhumi API Documentation

Developer Guide & Integration Reference

1. Overview

The **Bhumi API Platform** provides secure RESTful endpoints for accessing geographic data and address collection services. It is designed to assist researchers, developers, and multi-site applications in gathering location data efficiently.

Base URL: `https://api-bhumi.mostakinahmed.com`

2. Authentication

All requests require a secret API token. Authenticate using your choice of header:

```
Authorization: Bearer bhumi_your_secret_key_here
```

or

```
x-api-key: bhumi_your_secret_key_here
```

3. Endpoints

Get Geographic Data

Retrieve structured location data for research projects.

URL: `/v1/geodata` | **Method:** `GET`

```
{
  "status": "success",
  "data": {
    "location_id": "geo_984512",
    "address": "123 Research Avenue",
```

```
"city": "Dhaka",  
"country": "Bangladesh"  
}  
}
```

4. Integration Examples

JavaScript Fetch:

```
fetch('https://api-bhumi.mostakinahmed.com/v1/geodata', {  
  headers: { 'Authorization': 'Bearer bhumi_...' }  
});
```
